### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Terminal Disclaimer***

1. The terminal disclaimer filed on May 27, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on application no. 10/071, 743 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-28 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for metal or metal alloy solder particle, does not reasonably provide enablement for all solder particles. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

Claims 1-28 recite that the thermal interface material comprises fusible solder particles. By definition, solder particles are any particles that "melt to unite" and hence include polymer particles as well. The present invention is directed to the use of metal or metal alloy solder particles and hence the claims should correctly recite metal or metal alloy particles.

Art Unit: 1773

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2-4, 6-7, and 16-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2, 3, 6-8, and 16-19 recite that the weight percentages of the matrix material, the solder particles and the filler particles but do not state what the weight percentage is based upon. These claims should accurately recite that the weight percentages are based upon the thermal interface material.

It is unclear, from both the Specification and the claims, what is meant by a low-viscosity vinyl? Furthermore, the term "olifin" should be correctly spelled as "olefin". Appropriate corrections are required.

### ***Conclusion***
